Frequently Asked Questions (FAQ) (1/3)

- ACCOUNT -

What should I fill out "What do you need access to?" on the New Account Request?

See Sign Up for New Account

What should I do if I had an account on the former ACSS or Aviation Products (AP) site?

See Background Information

I want my username/email to be the general inbox of my company. How can I change it?

We suggest that a person's individual company email address be used for these accounts to reduce ambiguity in being notified of a given new release where a "general use" email address may be missed within a company. However, to change this Contact Us.

How do I close my account?

Contact Us

- LOGIN -

What should I do if I forget my password?

Use the Forgot Password link on the Login page.

What do I do if I didn't receive an email during login?

See Login

I was getting the two factor authentication emails but now I'm not. Did the website change?

No, your IT department or Outlook settings are likely what has changed.

- SUPPORT -

Who do I contact if I detect a website problem?

Contact Us

Frequently Asked Questions (FAQ) (2/3)

- PUBLICATIONS & SOFTWARE -

I can't find the publication or software I'm looking for. Why?

There are a few possibilities:

- You may be making a mistake on the search. See Search Tips.
- You may not have access to the file. To see what you have access to, see My Access.
- The file is not on the website. Check the Publication & Software Index for a full listing of all files on the system (whether you have access or not).

How do I know I have the latest version of a publication or software?

Check the Publication & Software Index which includes the latest revision number and date.

How do I get notified of a publication or software update?

You can manage what files you receive email notifications for via the My Email Notifications page.

- ACSS DATABASES -

How do I know if a given airport is in a database?

See ACSS Database & Airport Runway Search

How do I know if I need a database or not?

Each database release has an associated Technical Newsletter (TNL). The TNL describes the applicability of each database to a particular unit part number where the unit part numbers are found on the first page of the TNL.

Note that this is also somewhat evident by the name of the section, where the T2CAS database is applicable to the T2CAS (and TAWS+) units and the T3CAS database to the T3CAS units.

See ACSS Database & Airport Runway Search

More FAQs on next page…

Frequently Asked Questions (FAQ) (3/3)

- ACSS DATABASES -

How do I know if I need the newest <u>Terrain</u> database (DB) revision?

To aid in finding the changed airports, each Terrain DB release is accompanied by a Technical Newsletter (TNL) with a listing of changed airports, in the style of added, deleted, and changed.

Use the TNL as your guide on what effect may occur if no update is made in a given period.

For the latest downloads, <u>see ACSS Database & Airport Runway Search</u>.

- There is no expiration date that can adequately be applied to the Terrain DB.

- One noticeable result of having a database older than the 28 days of each release, is the potential for nuisance alert at a new airport or a newly relocated runway.

- Given that the number of airports is increasing approximately 1% per year worldwide, each month presents perhaps a 0.08% chance of each destination having a change that the TAWS system misses and therefore produces a nuisance alert.

- ACSS DATABASES -

How do I know if I need the newest <u>Obstacle</u> database revision?

The Obstacle Database changes often so we recommend you update the database quarterly. For the latest downloads, <u>see ACSS Database & Airport Runway Search</u>.

- The obstacle database contains a much higher rate of change, with 20% of obstacles undergoing some slight change or addition in a given 3-month cycle that the Obstacle database is under.

- The full listing of changed obstacles would be an enormous listing, so instead the recommendation is to simply update the database on its quarterly cycle.

Background Information

The L3Harris Commercial Avionics Technical Publications website is located at: https://techpubs.cas.l3harris.com

This site provides technical information for L3Harris Aviation Products, Inc and Aviation Communication & Surveillance Systems, LLC (ACSS).

This site replaces these former sites:
- ACSS (https://support.acsscustomerservices.com)
- Aviation Products (AP) (http://www.avionicstechpubs.com)
- Aviation Recorder (www.l-3ar.net)

? Did you have an account on the former ACSS or AP site?

Your account may have been migrated and you will need to set up a new password.

To set up a new password, go to:
https://techpubs.cas.l3harris.com/Login/ForgotPassword?isMigration=1

MACK MESA	10CO		USA	SAA	valid	RW25	Invalid
PHOENIX-MESA GATEWAY	KIWA	AZA	USA	SAA	valid	RW12L	Valid

* The definition of a basic airport's inhibition area is "a cylinder with a radius of 2Nm and height of 900 feet above the airport which is used to inhibit terrain". All GPWS modes including Modes 1 and 2 are fully activated in this case to provide protection when on approach to and departure from a basic airport. Predictive alert modes are not available at this point when the aircraft is operating in this cylinder. No DB landing tunnels are constructed on this airport's runways.

TAWS Validity
- **Valid** indicates runway information is present and therefore predictive alert modes are inhibited via a landing tunnel constructed on approach to these runways.
- **Invalid** indicates a basic airport*, meaning a basic cylinder is being used for terrain alerting inhibition.

ROPS Validity
Indicates whether Runway Overrun Protection System (ROPS) alerting is possible at this airport.
- **Valid** indicates runway thresholds *are* encoded for the additional ROPS alerting available on some T3CAS units that are certified for this feature.
- **Invalid** indicates runway thresholds *are not* yet encoded for this.

ACSS Databases & Airport Runway Search (3/3)

Comparing Database Versions
With a new database released every 28 days, customers often find it useful to compare one database to a previous one.

INDIRA GANDHI, DELHI	VIDP	DEL	MES	SAA	valid	RW29L	Valid
INDIRA GANDHI, DELHI	VIDP	DEL	MES	SAA	valid	RW29R	Invalid

Version 145
In this example, we see that the earlier version 145 of the database does not yet contain runways 11L or 29R.

Version 146
By entering the current database version (146 in this case), the user could discover that the new runways 11L & 29R are now present in version 146.

Request Access (1/2)

Navigation
This page can be accessed here.

① Please Note:
Filling out a Request Access form will provide faster service than using the Contact Us form.

What Items Do You Need Access To?
Use these options to tell us what additional publications or software you need access to by identifying the products you own either by model/name or part number.

(see next slide for more information)

Submit
Your request will be sent for approval. May take 2 business days.

Terms & Conditions
You must agree to follow the Terms & Conditions of the site when making this request.

Request Access (2/2): How to Use the Products Field

(1) Check the box next to Names / models / databases of products requested

(2) Enter model or description
Type in the name of product or model number.

A list of products will appear to choose from.

(3) Choose a product from the picklist by clicking it.
